EDUCATION

Gettysburg College   Gettysburg, PA
B.S. Computer Science and Physics   *Expected May 2027*

- **Relevant Coursework:** Data Structures, Full-Stack Web Development, Databases, Computer Networks
- **GPA:** 3.84/4.0

TECHNICAL SKILLS

- **Languages & Frameworks**: Java, Python, TypeScript, C#/.NET, React.js, Kotlin, Git, Node.js
- **Cloud & Databases**: AWS, MongoDB, Firebase, REST APIs, WebSockets, Google Cloud Platform
- **Developer Tools**: Git, Docker, LangChain, GitHub Actions, Jupyter, CI/CD Pipelines, Unit Testing
- **Methodologies:**: Agile/Scrum, Microservices Architecture, Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

Google   May 2025 – Aug 2025
Associate Software Developer Intern   *San Francisco, CA*

- Developed a high-performance Windows desktop client for Google Play Games on PC, improving launch times by 10% and reducing memory usage by 18%
- Enhanced web infrastructure and cross-process communication between the desktop client and the Progressive Web App, reducing memory use, CPU load, and launch time
- Streamlined build processes, improving maintainability and increasing automated test coverage

JPMorgan Chase   Apr 2025
Data for Good Hackathon   *Plano, TX*

- Built a predictive model for the National Education Equity Lab to identify high-impact courses and support strategic expansion

PROJECTS

Nvidia-Agent (TypeScript, Flask, LangChain, NVIDIA Llama Nemotron, WebView)

- Collaborated with a team to develop an AI-powered VS Code extension for automated ML code review, integrating NVIDIA Llama and Gemini AI via LangChain to analyze Jupyter notebooks and provide real-time recommendations for best practices, preprocessing, and model optimization
- Contributed to the full-stack architecture with a TypeScript extension frontend and Flask backend API, implementing intelligent notebook monitoring, visualization suggestions, and contextual code generation

AgroMesh (React Native, Expo, Gemini AI, MongoDB, AWS)

- Led development of an AI-powered mobile platform serving smallholder farmers, providing real-time crop health insights using Gemini AI-powered image analysis.
- Architected a microservices-driven backend on AWS + MongoDB, enabling scalable data ingestion and real-time API-driven analytics and deployed CI/CD pipelines to automate integration testing and rollouts
- Built a robust authentication system (JWT) and optimized performance, achieving faster image processing.

LEADERSHIP & ACTIVITIES

President, Society of Physics Students: Coordinated 6+ events and launched a mentorship program with 17% growth in engagement

Google Developer Student Club: Led 3+ development projects and hosted 2 workshops

CodePath Fellow: Completed a 10-week SWE course and built 10+ React applications

Resident Assistant (2 terms): Mentored 24 residents and organized 5+ events with 95% satisfaction
